

APPLICATION FOR THE CREATION OF A PUK

Additional information about this application

The safety of your PV plant is important for us. In order to protect you from unauthorized access, the communication with your plant via *Bluetooth*[®] or *Speedwire* is password-protected. If you lose your password, it is necessary to reactivate the access with the help of a PUK (Personal Unblocking Key).

To prevent misuse, please keep the PUK protected from unauthorized access.

For further information about the activation of the inverters, please refer to the manual of the respective communication product.

Order information

We will be happy to create the required PUKs for you. The fee is calculated according to the following scaling:

Number of inverters	Fee
1 - 25	€ 15 Basic + € 3.50 per device
26 - 50	€ 100 lump sum
51 - 100	€ 200 lump sum
101 - 1000	€ 300 lump sum
> 1000	€ 500 lump sum

Please note:

If you have more than 25 inverters, please contact our Service Line directly at +49 561 9522-2499. In order to generate the PUKs for you, we need your plant information in a specific file format. Thank you.

APPLICATION FOR
THE CREATION OF A PUK

Please fill out the form, sign it, and return it to us. Note that a handwritten signature is necessary. If you require a PUK for more than three devices, please also use the inverter list on the next page.
