

## Manufacturer's Declaration

### Usage of residual-current devices (RCD) of type A with Sunny Boy, Sunny Boy Storage, Sunny Island and Sunny Tripower inverters

The inverters listed below are compatible with RCD type A (in accordance with the standard EN 62109-1, section 7.3.8.). The inverters thus meet the requirements specified in DIN VDE 0100-712 and IEC 60364-7-712 that they are not able to feed in DC residual currents due to their design.

Whether an RCD is necessary and which types may be used in general depends on the respective applicable installation regulations in each case.

\*The inverters from firmware version 3.00.10.R are compatible with residual-current devices of type A and B that have a rated residual current of 30 mA or higher.

\*\*The inverters from firmware version 3.00.05.R are compatible with residual-current devices of type A and B that have a rated residual current of 30 mA or higher.
